

We Need You!

- Are you a family member of a child using mental health services?
- Are you an adult using mental health services?
- Do you want to play a part in shaping mental health policies?

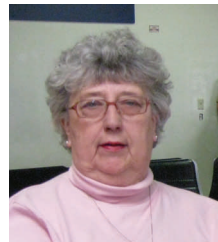

Greater Oregon Behavioral Healthcare, Inc. (GOBHI) needs your help. They need people who use mental health services to serve on advisory committees. There are several committees to choose from.

- Quality Improvement Committee (QIC) —Addresses quality of care issues
- Consumer Caucus—Looks at how policies affect people who use services
- Board of Directors—Shapes policies for GOBHI as an organization

For each meeting of the Consumer Caucus, QIC and Board of Directors participants receive a stipend, travel, meal and hotel expenses. It is like a working vacation where we meet and enjoy the company with the other leaders of GOBHI at meals and meetings.

Kerry Hawley: My time with GOBHI over the last ten years has been the most rewarding of my life even surpassing my career as an artist and architect. I have achieved recovery and growth through my participation. What I have learned through GOBHI has immensely broadened the scope of my peer specialist activities and service on the Warmline.

Sally Hannu: It's good that the consumer is represented (on the QIC). I like to keep informed on what is going on.
