

# WRAPAROUND

**Wraparound** is a planning process centered around youth and their families. With support from a team of professionals and natural supports, the family will set and accomplish goals, learn how to access services, and build confidence in using their voice to communicate their needs.

## WRAPAROUND PRINCIPLES

- Family Voice & Choice
- Team Based
- Natural Support
- Collaboration
- Community Based
- Culturally Competent
- Individualized
- Strengths Based
- Persistence
- Outcome Based

## ELIGIBILITY

Children and youth who are enrolled in Oregon Health Plan (OHP), are involved with 2 or more systems (Child Welfare, Juvenile, Developmental Disabilities, Mental Health, IEP/504), and youth who are displaying emotional, behavioral, or social concerns qualify for wraparound.

# COLLABORATION

Your Wraparound Trifecta will collaborate with community partners, service providers, and other agencies you might be connected with to make sure there is consistent communication as well as ensuring you and your family's needs are expressed to everyone involved.

### Examples of **community partners**

- School
- DHS
- Juvenile Department
- Primary Care Providers/Med Management Team
- Anyone who is identified by family such as natural supports and family members.

**FAMILIES ARE STRONGER TOGETHER**

## WHAT CAN I EXPECT?

After receiving a referral, a WCC will contact your family to begin getting to know your family, collect information, discuss family and youth partner services, and list members you'd like to be part of your team. The WCC will work with you and your family to identify strengths and needs, coordinate monthly team meetings, and set goals.

# THE WRAPAROUND TRIFECTA

## WRAPAROUND CARE COORDINATOR FAMILY PARTNER YOUTH PARTNER

A **wraparound care coordinator** helps coordinate regularly scheduled meetings with all the services a family is receiving and help the family make and meet goals of their choice.

A **family partner** helps coordinate services and identify/connect parents and caregivers to community resources. They enable and empower families as they make informed decisions relating to their child's mental health services. They advocate for your family in whatever way is required, ensuring your voice is heard and your needs are met.

A **youth partner** provides support to youth through their own lived experience. They help youth identify goals and work together to achieve them as well as learning how to advocate for themselves.
